

ComputerXplorers 'enriches' Hinckley school OFSTED report

ComputerXplorers is celebrating its contribution to Battling Brook Primary School's latest glowing OFSTED report, which graded the school as outstanding. The report specifically mentions the role of ICT at the school several times and how the 'curriculum is enriched and enhanced with some very good use of ICT to support learning.'

ComputerXplorers teach computer skills to children aged 3 to 13 by offering weekly classes in schools, nurseries, holiday clubs and community venues. Children are given the opportunity to try new experiences, like clay animation, video game design and digital photography.

Head of the Battling Brook Primary School, John Talbot said: "The ComputerXplorers club enriches the ICT provision at Battling Brook and provides an ongoing schedule of exciting and innovative activities, which have proved popular with pupils of all ages. Providing children with opportunities to learn beyond the school day is a key part of the Extended Schools agenda and we happily support this initiative. Some of the sessions have led to staff picking up new skills and that has had a direct impact in the classroom."

Nigel Toplis, managing director of ComputerXplorers said: "I'm delighted that ComputerXplorers is being acknowledged for the role it can have in helping to improve the ICT skills amongst school age children. The programmes are all cross referenced to the National Curriculum and we can compliment the hard work that schools put in during the school day. Children have so much fun at our sessions they don't realise how much they are learning."

Anyone who would be interested in teaching with ComputerXplorers or parents who would like their children to attend a class should contact Diane Taylor, ComputerXplorers Franchise Owner in South Midlands, on tel: 0116 275 1853 or visit www.southmidlands.computerxplorers.co.uk

Notes to Editors:

About ComputerXplorers

ComputerXplorers is part of the world's largest franchised network providing quality technology education for children from the ages of 3 to 13. The clubs and classes are engaging, educational and fun, and are run in a variety of settings, such as after school clubs, pre-school and nurseries, summer camps and in-curriculum time classes. For pre-school children ComputerXplorers sessions cover everything from language and literacy to maths, science and music. Older children can learn a range of exciting subjects, including computer animation, rocketeering, film-making, creating video games and robotics!

Specialist ICT classes during core curriculum time are also part of the service and ComputerXplorers provide the instructor, lesson plans, the software and peripherals.

ComputerXplorers has been established for more than 20 years and has taught over 3 million classes. Each ComputerXplorers business in the UK is independently owned and operated, delivering an extensive range of programmes using prepared lesson plans and curriculum developed by educational specialists.
