

ComputerXplorers is coming to a school near you!

School is about to get a lot more interesting thanks to ComputerXplorers, fun and exciting ICT classes for 3-13 year olds, being launched across Sussex by Worthing based Mark Bullen this week.

Mastering technology skills at an early age increases children's e-confidence and competence, and gives them a great head start to their education. ComputerXplorers runs classes that are inspirational, and designed to enhance the learning skills of children of different ages and abilities. The classes are held in nurseries, pre-school settings, primary schools, after school clubs and summer camps.

Mark's 11 yr old daughter, Grace, has already given the thumbs up! Mark explains: "Grace looked at the course materials and tried out some of the software and she thinks it's great. That was a really important acid test!"

Mark adds: "Learning how to use a computer and software is an essential skill to assist children throughout their education and in the workplace. ComputerXplorers classes are great because they are such fun that the children don't even realise they are learning!"

"We provide all the equipment, materials and the teachers so there is nothing for the schools and nurseries to do other than provide the room and the children!

ComputerXplorers is helping schools across the county to meet their curriculum needs for ICT and I'm hoping it's going to be a big hit in Sussex."

Younger children can develop their confidence and build their academic readiness skills in core areas such as literacy, maths, science, music and art. Older children can improve their computer and software skills, and learn some exciting new computer-based subjects like clay animation, movie-making, robotics and how to design their own video games.

Anyone who would be interested in teaching with ComputerXplorers or parents who would like their children to attend a class should contact Mark Bullen,

Notes to Editors:

About ComputerXplorers

ComputerXplorers is part of the world's largest franchised network providing quality technology education for children from the ages of 3 to 13. The clubs and classes are engaging, educational and fun, and are run in a variety of settings, such as after school clubs, pre-school and nurseries, summer camps and in-curriculum time classes. For pre-school children ComputerXplorers sessions cover everything from language and literacy to maths, science and music. Older children can learn a range of exciting subjects, including computer animation, rocketeering, film-making, creating video games and robotics!

Specialist ICT classes during core curriculum time are also part of the service and ComputerXplorers provide the instructor, lesson plans, the software and peripherals.

ComputerXplorers has been established for more than 20 years and has taught over 3 million classes. Each ComputerXplorers business in the UK is independently owned and operated, delivering an extensive range of programmes using prepared lesson plans and curriculum developed by educational specialists.
